

# Where Is the Ark?

Many people are looking for it, all the way from Ethiopia to the Middle East, under the Temple Mount, and Spain. It is well known that Adolph Hitler and Heinrich Himmler spent lots of money trying to locate the Ark, as they thought that would give them the power to conquer the world. So, if the Jews supposedly find it, we can suspect that it will be a fake reconstruction of the Ark, then they will use that as the basis for building the Temple.

Revelation 11:19: And says: "The Temple of God in Heaven was open, and the Ark of His Covenant was seen in His Temple." So, it is in God's possession. God probably took it up there before the Babylonians destroyed the Temple in 586 BC.

When you look at Revelation 4 and 5, gives us a vision of the Throne and of God as well. Revelation 11 shows us that the Ark of the Covenant is there someplace, too. Then The Ark of the Covenant was made for the Holy of Holies for the Temple on Earth. But God's literal throne in Revelation 4 & 5 bears little semblance to the Ark of the Covenant. Therefore, The Ark is not on the earth today, and all the searching for it is in vain. But all the video companies can make money by running searches for the Ark of the Covenant.
